

## Make your own Spitfire!

1. Colour each piece and then cut out carefully (including the sections in between the two sides of the main body of the aircraft).
2. Fold and stick together the two sides of the main body.
3. Carefully cut a slit along both sets of dotted lines.
4. Slot the wings into the slit at the front of the aircraft, and the horizontal stabiliser into the slit at the back (you may wish to secure with tape).

Main body

*This end faces the front of the aircraft*

Wings

*This end faces the front of the aircraft*

Horizontal Stabiliser

**TIP:** for extra stability, you may wish to stick or photocopy the template onto cardboard first.
